

Improvements at University/Lincoln/Quebec

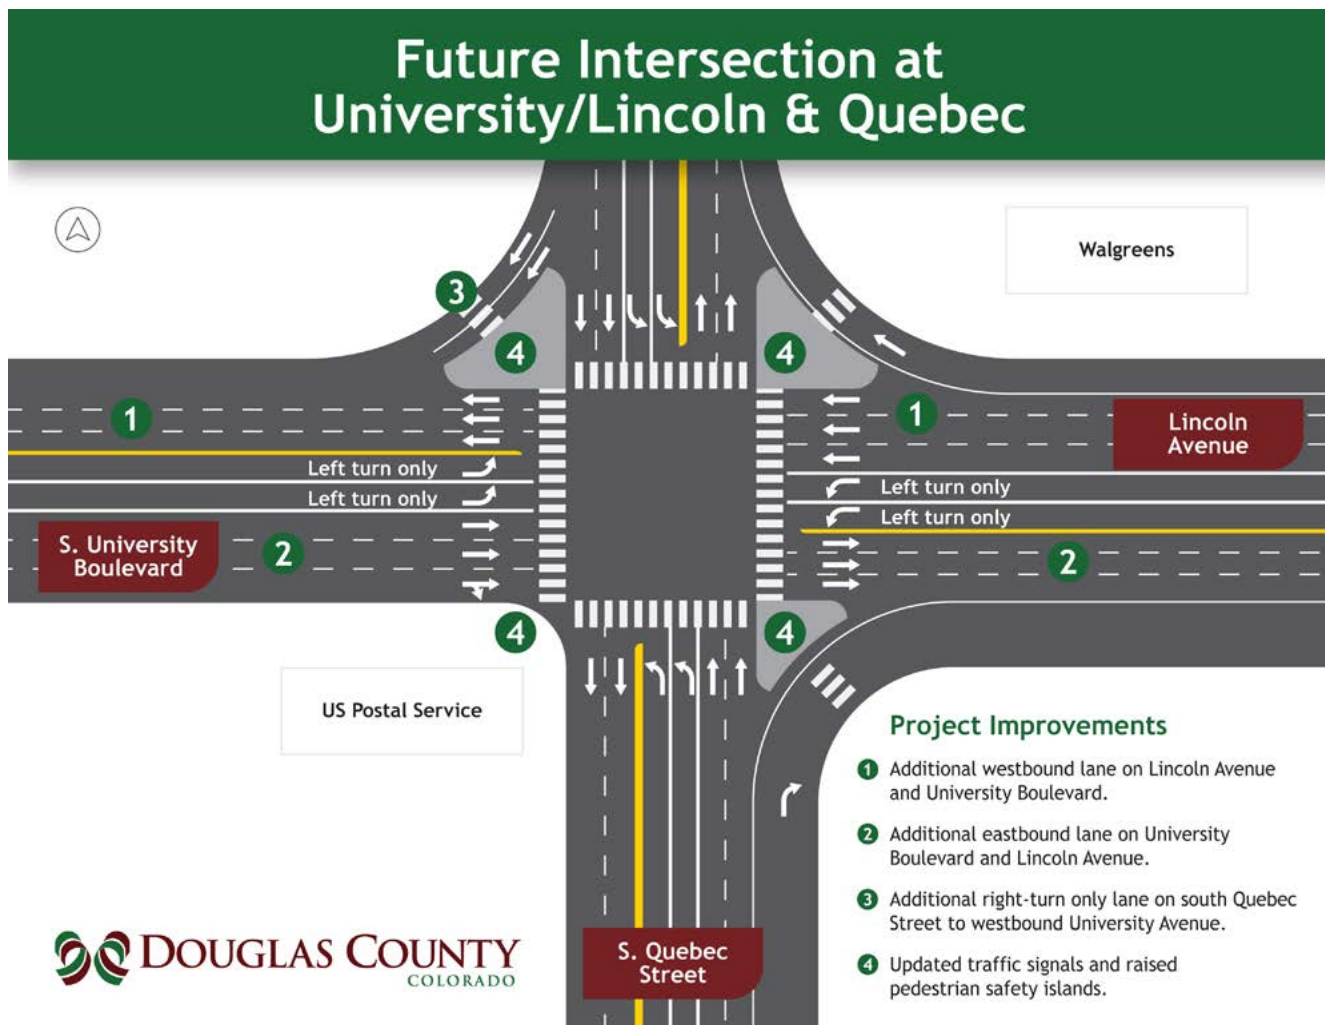

Signal and Intersection Reconstruction

Project Summary

Douglas County is improving road quality and safety at University/Lincoln and Quebec in Highlands Ranch. A project to rebuild and reconfigure the full intersection will begin in summer 2023. Work includes a new traffic signal system, raised pedestrian safety islands, additional eastbound and westbound lanes on Lincoln Avenue and University Boulevard, and a new right-turn-only lane from southbound Quebec Street to westbound University Boulevard.

Construction on this \$13 million project is anticipated to begin in July 2023 and is expected to be complete in fall 2024. A winter break in construction will occur between November 2023 and March 2024.

Contractor	Project Cost	Project Timeline
Villalobos Construction	\$13 Million	July 17, 2023 to Fall 2024

Project Funding

This project is completely funded by Douglas County. Revenue from property taxes and highway user fees goes into the county’s Road and Bridge Fund. As required by state law, this fund is dedicated to the construction and maintenance of county roads and bridges. Half of that revenue is shared back to municipalities for road and bridge work.

Douglas County Transportation

A safe and efficient transportation network is foundational to economic prosperity and your quality of life. In partnership with others, Douglas County is making historic investments to address present and future mobility demands.

In 2023, 50% of the County’s budget will be invested in capital and maintenance projects countywide. That’s \$248 million to increase safety and mobility for drivers, cyclists, and pedestrians.

Most of the funding for transportation projects comes from sales and use taxes, user fees and voter-approved measures specifically for transportation projects. To stretch your dollars, the County works with public and private partners at the local, regional, state and federal levels. Most new construction projects in Douglas County include funding from partner organizations.
